The retainer for drawings or photographs encompasses a round magnet (1) and includes rim (2), top section (3) and bottom section (4).

An annular head (5) has a collar (6) and contact shoulder (7). The collar has a protruding rib (10) facing the side surface towards the magnet and is pressurised against the rim of the magnet. The contact shoulder protrudes radially inwards and grips the rim section of the top of the magnet. The magnet can be pushed from the head and can be pushed again onto the top of the magnet. An inlay leaf (8) can be placed on top of the magnet.
